## NEWSLETTER DECEMBER 2022

## Dear friend of the Minett UNESCO Biosphere, 2022 was a year full of projects and interesting moments for the Minett UNESCO Biosphere. In this

newsletter, however, we will not look back, but ahead. Starting in the middle of the month, we will present our review of the year on our social media channels. Today we look ahead to the first snow of the winter and how to remove it without harming the environment.

We look ahead to the upcoming holidays and have a special gift idea to spend some pleasant hours

We look ahead to St. Barbara's Day, which will be celebrated this weekend in the Minett UNESCO Biosphere.

And we look ahead to 2023 and reveal the first ideas and projects that will be implemented next year with our nature and environmental education programme, MiNELL - Minett Natur an Ëmwelt Léierlab.

But we also take this opportunity to wish you a wonderful pre-Christmas season and a relaxing time between the years. Also remember that our biosphere with its nature reserves has a lot to offer even in

winter, that can be discovered within a short hike distance. **Your Minett UNESCO Biosphere Team** 

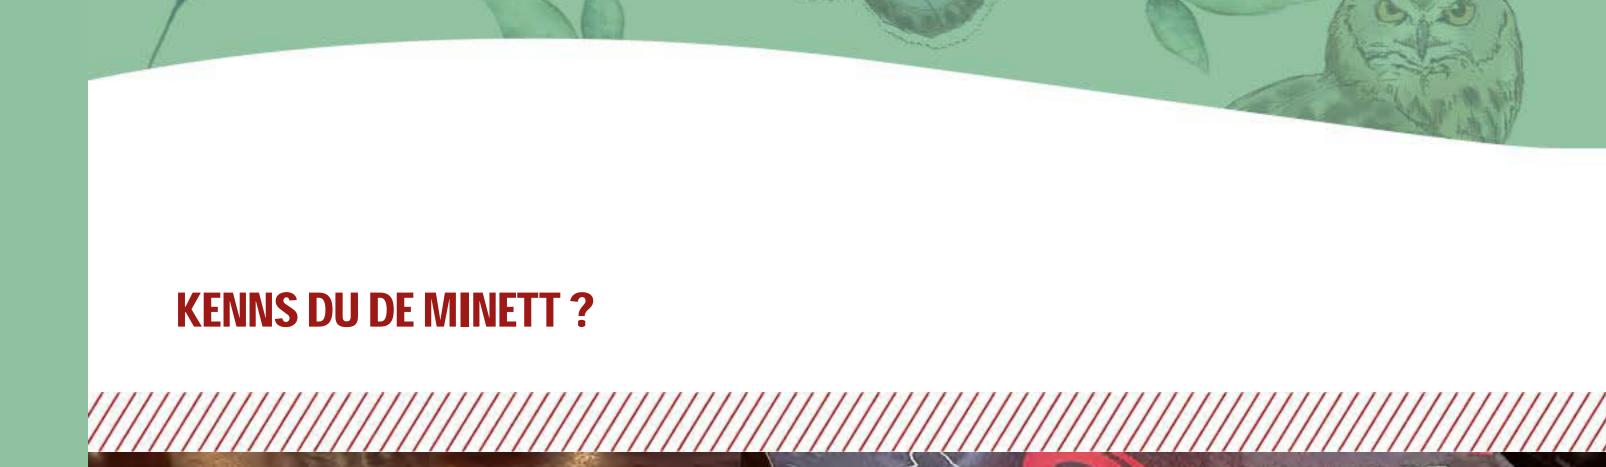

stairs and pavements?

THESE SOLUTIONS WILL NOT LEAVE YOU COLD!

Road salt is a real weapon of mass destruction for water bodies, soils and vegetation. What are

environmentally friendly alternatives to avoid breaking a leg when it gets dangerously slippery on

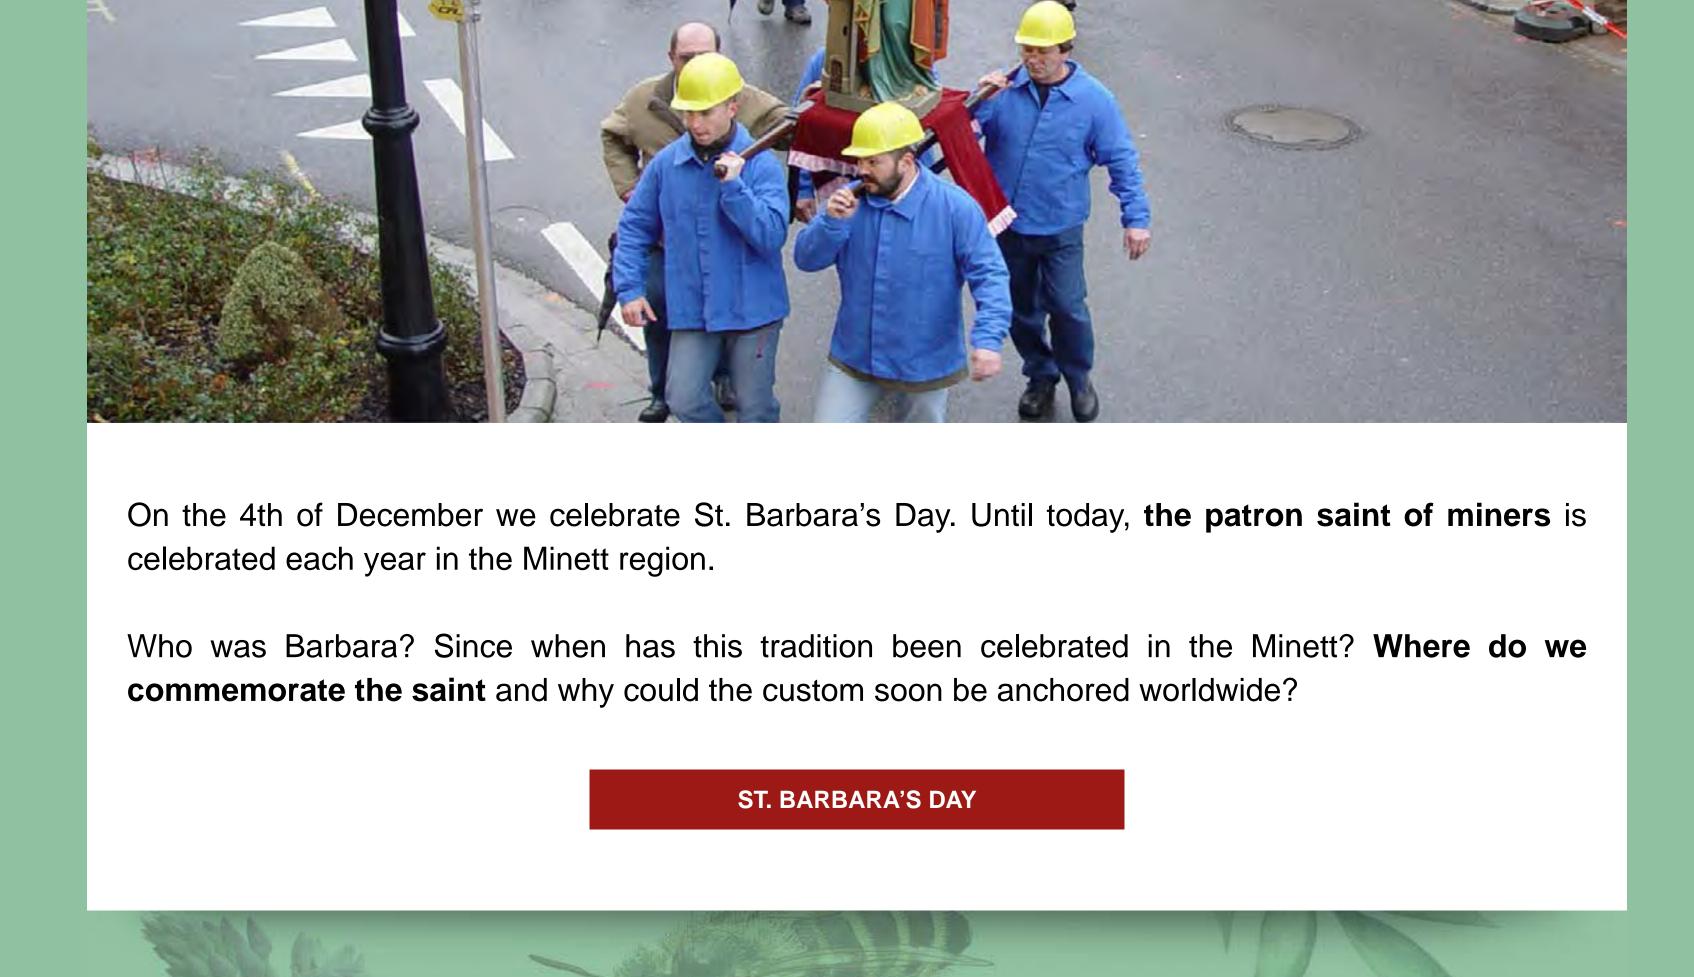

**DISCOVER THE MINETT!** 

In this exceptional area, with its 11 municipalities, over 150 different nationalities, nature reserves and

biotopes, cultural institutions and tourist opportunities, many discoveries can be made. Above all, an

enormous number of places and stories, some of which are not even known to the locals.

## **DECEMBER 4: ST. BARBARA'S DAY**

**3 QUESTIONS TO LUCIE MAJERUS** 

Lucie Majerus has been working for the PRO-SUD syndicate since mid-October. As a reinforcement of our team, Lucie takes care of MiNELL, the Minett Natur an Ëmwelt Léierlab.
